POWERROLL L-Series highest capacity of any PowerRoll machine. Created for the rigors of the paper and cable industries, the RL is built with many high performance features.

High-Powered DC Motor: Brushless and chainless, it is virtually maintenance free and able to push nearly 100,000 lbs/45,300 kgs.

Long-Lasting Batteries: Drop-in style and quick to recharge, RL batteries increased battery life with more amp hours.

Comfortable Trigger Throttle: All controls at your fingertips with improved feathering for fine speed control.

Telescopic Handle: Supports a wide range of heights.

Customizable: Pick from options that best suit the specific needs of your operation.
